Allowable Subject Matter

1. Claims 1-22 are allowed.

2. The following is an examiner's statement of reasons for allowance:

None of the prior art of record teaches or suggests a method of controlling a fusing temperature of a fusing roller having a cylindrical roller, a heater and a rubber layer with a predetermined thickness on the surface of the cylindrical roller, said method comprising the steps of determining whether a predetermined new power control period starts and calculating a power supply ratio corresponding to a power to be supplied to the heater during the new power control period with respect to a maximum power that can be supplied to the heater; wherein the power supplied ratio is calculated by adding a predetermined offset value  $\beta$  to a control value that is a product of a predetermined coefficient  $\alpha$  and a subtraction of a measured temperature of the fusing roller from a target fusing temperature, and the offset value  $\beta$  is smaller than or equal to a ratio of a power supply with respect to the maximum power supplied to the heater.

Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure:

Cho et al. ['789] disclose an image fixing control method.

- Yamamoto ['388] discloses an image heating apparatus..

- Oba et al. ['360] disclose a fusing device.

- Toyohara et al. ['462] disclose a fixing device having power supply control element.
